

Make Citrus Great Again

# INSTALLATION INSTRUCTIONS: Six Easy Steps to Install Your Tree Defender

## STEP 1.

Install 3/4 inch schedule 40 PVC stake as closely to wrapped tree as possible. Stake needs to be 12 inches longer than bag length so that stake can be inserted into ground 12 inches.

## STEP 2.

Place PVC cap on top of PVC stake.

## STEP 3.

Slide Tree Defender over top of stake and tree. Be sure to cover tree completely. We highly recommend securing the top with a zip tie to prevent too much movement from the wind.

Patented: U.S. Patent No. 11,122,752

## STEP 4.

Once Tree Defender is on tree completely, bunch up material around base of tree trunk and wrap.

## STEP 5.

Close zip tie around Tree Defender material, PVC stake, and tree wrap. Ensure it's tight to prevent bugs from entering.

## STEP 6.

Sit back, relax and let Tree Defender do the work.

OK... so maybe just 5 steps.
